

FORWARD

The fourth edition of the “Register of Military Family Support Services in Hawaii” has been prepared by the USCINCPAC Surgeon’s Office, Family Advocacy Division, in response to numerous requests by military and civilian communities to update the publication.

It has been gratifying to receive such positive feed-back on this reference manual and to be made aware of the documented need to have information of this nature available to family advocacy staff, protective service workers and relevant service providers in one concise source of information.

The eight categories of programs/services listed within each military installation include Aid and Relief Societies, Armed Services YMCA, Chaplain Corps, Child Development, Dependent Activities, Family Support Services, Health Services and Legal Services. Recent directives and instructions, as well as state statutes that address various aspects of child abuse, have been included as well.

Should you have any comments, questions or concerns regarding the information contained in this directory, please contact the USCINCPAC Chief, Family Advocacy Division (J072) at 477-6956.
