

## Our Mission

Joint Interagency Task Force West, together with U.S. Law Enforcement, the interagency, and Partner Nations, leverages all-domain capabilities to detect, monitor, and target illicit drug trafficking, enabling interdiction and apprehension to reduce the flow of drugs, degrade and dismantle drug trafficking organizations and transnational criminal organizations; reduce the risk to American lives and U.S. interests; and reduce threats to a free and open Indo-Pacific.

## Our Priorities

**1** PROTECT THE HOMELAND

**2** STRENGTHEN OUR NETWORKS

**3** DISRUPT & DEGRADE THREAT NETWORKS

**4** COUNTER MALIGN INFLUENCES

*“The critical training that JIATF-W facilitated will help Fiji respond to immediate threats, provide life-saving emergency care, conduct maritime domain awareness, enforce international and Fiji maritime law, and protect Fiji’s oceanic resources in the territorial seas and exclusive economic zone. The United States remains a committed partner to the region, ensuring a strong and consistent defense presence to support peace, security, and stability.”*

(Chargé d’Affaires Anthony Greubel, U.S. Embassy Suva)

*“I am writing you to express my thanks and appreciation to Joint Interagency Task Force West (JIATF-W) following the successful completion of three-weeks of tactical medical training here in Vietnam. This was first time since the pandemic that we have been able to continue conducting joint-trainings with JIATF-W and much like previous JIATF-W trainings, this training was a great stride forward for the capacity building effort here in Vietnam.”*

(Steve Vo, DEA Hanoi Attaché)

*“JIATF West always provides us with unique and challenging projects that allows us to exercise our contractor base in preparation for future contingencies. It is also exciting to see our foreign partners immediately start operating out of the facilities we construct.”*

(Lt. Cmdr. Rama Mutyala, NAVFAC Pacific ROICC Thailand)

*“The JIATF West intelligence team continues to be an integral partner in providing valuable intelligence to disrupt the flow of precursor chemical shipments used to produce dangerous drugs such as illicit fentanyl.”*

(Daniel Dobas, Section Chief, DEA Chemical Investigations)
